

CHAPTER V

CLOSING

A. Conclusion

The era of technological disruption certainly brings so many impacts on human life, especially for the generation that was born and grew up amid rapid development; yes, they are "Generation Z," which is also known by many terms ranging from strawberry generation, digital native, iGeneration and various other terms. From this term, we can see and understand that Generation Z is certainly a complicated thing, not easy to reach, especially amid an era of technological disruption. The cycle of human life is so fast and easy to change. Generation Z, as the youth in the middle of the Church today, has a huge struggle when faced with a reality that is part of their lives and certainly cannot be separated from the survival of individuals today. Yes, the "Digital Challenge" has become an integral part that shapes Gen Z's mindset, behavior, and way of interacting. Therefore, there is a need for a spiritual leader who can answer and fulfill the needs of the youth, especially Generation Z, in the manifestation of the love He has revealed to the chosen people.

Spiritual leadership, one of the important options or choices that can be used in the life of a leader both in the community and organization, which is expected through a strong spiritual spirit, can answer these challenges. Unfortunately, in the context of the life of the Toraja Jemaat Londa Church,

spiritual leadership has not been able to answer the digital challenges of Generation Z in today's era of technological disruption. Realizing this, leaders should open a collaborative communication space to unite generations in their various ideas and life experiences. Thus, all generations can learn to understand each other and appreciate diversity. Also, leaders can create more collaborative programs to bridge this intergenerational gap so that a sense of belonging in the community exists and the spirit of spiritual leadership can take root and grow among leaders and community members.

B. Suggestion

1. Gereja Toraja Jemaat Londa

In the digital era, which has a big challenge and impact on Generation Z, the church has a crucial role in expressing and channeling the form of love manifestation to others. By looking at the reality that occurs among youth, especially Generation Z in the Toraja Jemaat Londa Church, church leaders and all Church Organization administrators have a big task and responsibility in this regard; if they want 10-15 years in the future, all members of the congregation still fill the church. Thus, the existence of interesting and digital-based programs is expected to bridge the gap among congregation members, and digital challenges are no

longer seen as a detrimental thing but as a motivation to continue to improve in declaring its existence as one body of Christ.

2. Institut Agama Kristen Negeri (IAKN) Toraja

As one of the institutions that focuses on the religious field, it is certainly a special thing for this campus. By preparing graduates with high-quality values who are expected to answer the needs and contribute to the church's and society's progress, IAKN Toraja always continues to bring light and steadfastly witness the work of salvation in Christ. Thus, the author hopes that IAKN Toraja continues to grow and show the best side of the spiritual leadership spirit that should be built since setting foot on campus. Thus, IAKN Toraja graduates can be present in the congregation as leaders.

3. Future Researchers

By looking at what is happening today, specifically when the author carried out the research, hoping very much that this research will continue to be developed and produce a brilliant idea and idea until it arrives at a conclusion that is so real in answering and bridging every leader's challenge in answering the needs of the congregation, especially in preparing to enter the era of the industrial revolution, where all human space will no longer be limited, the digital world will dominate the life of the church and society. The existence of youth as the next generation of

the church will be a big question mark. We hope that future researchers can perfect this research.
